Profile

Results-driven Software Engineer with 5+ years of hands-on experience developing and maintaining software solutions. Skilled in object-oriented design, algorithms, and building efficient, scalable systems. Proven track record of contributing to production-level applications, improving performance, and solving complex technical challenges. Passionate about writing clean, maintainable code and continuously enhancing technical skills in fast-paced environments.

Skills

Languages:	Kotlin, Java, Python, Dart, JavaScript, TypeScript, Golang.
Technologies:	React Native, Flutter, NextJS ,NodeJS, ExpressJS, Firebase, AWS, Google Cloud, Docker, Terraform, MySQL, SQLite, MongoDB, PostgreSQL, Git, REST API, HTML, CSS, Linux, WordPress, Json.
Soft Skills:	Teamwork, Leadership, Problem-solving, Time management and Adaptability.

Professional Experience

SafeBuddyCode, *Full Stack Developer (Remote Work)* Dublin - July 2023 - Present

- Developed a responsive, high-performance web application using Next.js, improving user experience and page load efficiency.
- Designed and implemented a Flask-based backend, ensuring secure data handling and reliable user authentication.
- Built an analytics dashboard delivering real-time insights into sales performance, enabling data-driven decision-making.
- Implemented content and product management features, streamlining updates and improving overall site usability and engagement.

Monteva, *Software Engineer (Remote Work)* Qatar - Sept 2022 – Sept 2024

- Developed a cross-platform mobile application (Android & iOS) and a responsive web dashboard using Next.js, delivering a unified user experience across platforms.
- Designed and implemented analytics and management tools, enabling clients to track activity, handle customer requests efficiently.
- Built a scalable backend in Go, developing APIs to support seamless communication between mobile and web applications.

Green Apple Travel & Tourism, *Web Developer (Intern)* Dubai - Apr 2021 - July 2021

- Designed and developed responsive, user-friendly interfaces using HTML, CSS, and JavaScript, improving overall usability and user experience.
- Implemented SEO best practices to enhance website visibility and maintain strong search engine rankings.
- Diagnosed and resolved hardware and software issues, ensuring minimal downtime and efficient system performance.
- Strengthened system security by implementing access controls and maintaining up-to-date security protocols.

Morial Mod Watches, *Web Developer (Part-Time)* Dubai - Feb 2018 - Feb 2020

- Redesigned and rebuilt company websites from the ground up, delivering major improvements in performance, usability, and user engagement.
- Troubleshot and resolved technical issues, minimizing downtime and improving system stability.
- Strengthened security by implementing best practices to protect company systems and customer data.
- Administered email systems and supported customer communications in a timely and professional manner.

Education

Griffith College, *MSc Computing: First-class honours* Sept 2022 – Sept 2023

- **Courses:** Parallel & Distributed Programming, Cloud Platforms & Application, Information Security, Agile Software Development, Mobile Development.

Canadian University Dubai, *BSc Computer and Networking Engineer:* Sept 2018 - May 2022

- **Courses:** Java Programming, Database Design, Network Programming, System Analysis and Design, Project Management, Network Security and Administration, Intelligent Systems, System-Level Programming.

Projects

Classified Mobile App (Flutter, Node.js, MongoDB, Cloudinary)

- Developed a user-friendly platform for buying and selling items in Ireland, leveraging Node.js with MongoDB for the backend and Cloudinary for image storage.
- Implemented advanced features, including a robust fuzzy search functionality that ensures product discovery even with misspelled words.
- Integrated augmented reality capabilities by utilizing remove.bg to remove backgrounds from product images and displaying them in real-time through the device's camera, enhancing the shopping experience.

E-Commerce App (Flutter, Node.js) 🔗

- Developed a mobile e-commerce application using Flutter framework for the front-end and Nodejs for the back-end.
- Built an admin panel to manage products, accept orders, and display a total earnings chart.
- Integrated Google Pay for payment processing, providing a seamless and secure payment experience for customers.

Video Meeting App (Flutter, Firebase, Jitsi) 🔗

- Designed and developed a video meeting application using Flutter and Firebase, enabling users to host and join virtual meetings from their devices.
- Utilized Firebase Cloud Firestore and Firebase Cloud Functions to store and manage user data, ensuring secure and scalable data management.
- Integrated video calling features using the Jitsi SDK, enabling high-quality video and audio communication between users.
- Implemented user authentication and authorization using Firebase Authentication, ensuring secure access to the app's features and data.

Learning Management System (NextJS, Typescript, Express, Stripe, Socket IO, MongoDB, VdoCipher)

- Built a full-featured Learning Management System using the MERN and Next.js stacks with TypeScript.
- Key features included user authentication, Stripe payment integration with real-time notifications via Socket.IO,
- Custom analytics dashboard to track sales and course uploads.
- Encrypted course content with VdoCipher to prevent unauthorized recording.

Certificates/Awards

Parallel and Concurrent Programming with Java 1 🔗 Feb 2023
Java Algorithms 🔗 Feb 2023
Java 11+ Essential Training 🔗 Feb 2023
React Native Udemy Certificate 🔗 Feb 2023
Flutter & Dart Udemy Certificate 🔗 May 2022
